Engineering Reliable Digital Solutions

StackBridges Technologies helps organizations design reliable software, modernize their digital infrastructure, and move forward with confidence — from our headquarters in Paris, France.

ABOUT

Built on technical rigor and trust

Founded in 2026 in Paris, France, our founding team — Africans trained in France — combines international engineering standards with a deep understanding of client needs. We serve enterprises, government, financial institutions, NGOs, and startups.

MISSION

Modernize technology, develop local talent

To help organizations modernize through reliable software, secure cloud infrastructure, and thoughtful digital change — while developing local technology talent and contributing to our clients' digital future.

CORE SERVICES

What we do, in plain terms

Software Engineering

Website creation, custom business applications, connections between your systems, and modernizing older software

Cloud & Operations

Hosting and running your systems securely on major cloud platforms, with automated updates and smooth migration

Digital Transformation

Organizing your digital tools, designing the right solutions, and guiding your modernization step by step

Cybersecurity & Integration

Built-in security from the start, security reviews, connecting your tools together, and team training

INDUSTRIES

Sectors where reliability is non-negotiable

Telecommunications · Energy · Financial Services · Automotive · Government · NGOs · Healthcare · Education · SMEs & Startups

WHY STACKBRIDGES

What sets us apart

- Reliable, easy-to-maintain software
- Security built in from the start
- Long-term partnership approach
- Expertise across major cloud providers
- International standards and technical rigor
- Structured training and mentoring
